

We're Pleased To Announce These Exciting New Practice Enhancements at Long Island IVF!

We've been hard at work over the past several months making many improvements here at Long Island IVF – and we want to share them with you and your patients.

Our New IVF Center in Melville

You may already know about our new state-of-the-art IVF center that opened in April of 2008. Our new center, on the Nassau/Suffolk border

in Melville, includes medical suites, exam and surgical procedure rooms, and embryology laboratories all in one modern and spacious facility. It has been designed with every patient comfort and convenience in mind and the new Center has been very well received by patients and physicians alike.

New Additions to Our Physician Team

We are also pleased to announce the addition of two physicians to our team. **Dr. Satu Kuokkanen** is board certified in Obstetrics and Gynecology and is board eligible in Reproductive Endocrinology and Infertility (REI). She received her medical and PhD degrees from the University of Helsinki, Finland and completed post-doctoral training at the Human Genome Research Center at the National Institutes of Health. She completed her residency in Obstetrics and Gynecology at the Albert Einstein College of Medicine/Montefiore Medical Center in 2005.

During her training, Dr. Kuokkanen received several teaching and academic achievement awards and presented her research on molecular genetics at numerous leading national and international conferences. After completing her residen-

cy, Dr. Kuokkanen completed a three year REI fellowship at the Albert Einstein College of Medicine/Montefiore Medical Center. She joins us in our Melville and Lake Success locations beginning September 1, 2008.

We've also expanded our male reproductive medicine services and are partnering with the Department of Urology at Stony Brook University School of Medicine. **Dr. Yefim Sheynkin** has joined our team and will devote his time exclusively to the evaluation and treatment of male infertility. "Dr. Sheynkin is very well-known in the region and we are proud to have him as part of our team," says Dr. Steven Brenner. "His experience and training at Stony Brook Medical Center and in New York before that has resulted in years of expertise in the microsurgical treatment of male infertility and sperm retrieval techniques for IVF", he adds.

A New Office In Stony Brook

Long Island IVF has three office locations in Melville, Lake Success and, in September, 2008, in Stony Brook. Our former location in Port Jefferson will move to *a new, more convenient office in nearby Stony Brook*. We will be seeing patients in the Stony Brook Medical Park at 2500 Nesconset Highway (Rout 347) in Building 19.

Our New Website

We are also pleased to announce to you and your patients that we have a new website at **www.longislandivf.com**. This new site is easy to use, comprehensive and educational and we hope you'll visit our site soon – and refer patients to it. Our site contains all kinds of important information about us, our programs & services, directions to our offices, forms and applications, fertility myths, book recommendations – and much more.
